The College of Engineering and Management, Jalgaon was established in year 2001, approved by AICTE, New Delhi & affiliated to Dr. Babasaheb Ambedkar Technological University, Lonere, we are Khandesh College Education Society's brain child, an institution with a vigorous past, a dynamic present, and brilliant future.

We offer a world of opportunities to students with modern educational philosophy and experienced faculty members. Our institution includes strong engineering foundation design to prepare engineers with a broad base of technical knowledge and personality.

Please visit <https://coem.kces.in/> for more details.

ABOUT SPOKEN TUTORIAL

Spoken Tutorial is a multi-award winning educational content portal. Here one can learn various Free and Open Source Software all by oneself. Our self-paced, multi-lingual courses ensure that anybody with a computer and a desire for learning can learn from any place, at any time and in a language of their choice. Please Visit <https://spoken-tutorial.org> for more details.

COVID-19 Pandemic demands Students to learn how to use online platforms, adapt new learning methods, maintain student engagement and find new ways to evaluate and LaTex is a high quality type setting system, it includes features designed for the production of technical and scientific documentation, in this series you can also learn to use XFig, the diagram component of LaTeX.

LaTeX uses the TeX typesetting program for formatting its output, and is itself written in the TeX macro language. LaTeX can be used as a standalone document preparation system.

ELIGIBILITY

- students from any University, of Degree /Diploma levels, are eligible to participate..
- All the Participants are required to fill up online registration form before the deadlines.
- The Spoken Tutorial Project team conducts online exam and gives certificate to those who pass (by earning min.40% marks) the online test.
- Participants should upload the proof of payment while registering through Google Forms.

LaTeX is a high quality type setting system, it includes features designed for the production of technical and scientific documentation, in this series you can also learn to use XFig, the diagram component of LaTeX. LaTeX uses the TeX typesetting program for formatting its output, and is itself written in the TeX macro language. LaTeX can be used as a standalone document preparation system.

LaTeX is intended to provide a high-level, descriptive markup language that accesses the power of TeX in an easier way for writers. In essence, TeX handles the layout side, while LaTeX handles the content side for document processing. LaTeX comprises a collection of TeX macros and a program to process LaTeX documents, and because the plain TeX formatting commands are elementary, it provides authors with ready-made commands for formatting and layout requirements such as chapter headings, footnotes, cross-references and bibliographies.

ABOUT SPOKEN TUTORIAL

Spoken Tutorial is a multi-award winning educational content portal. Here one can learn various Free and Open Source Software all by oneself. Our self-paced, multi-lingual courses ensure that anybody with a computer and a desire for learning can learn from any place, at any time and in a language of their choice. Please Visit <https://spoken-tutorial.org> for more details.

COVID-19 Pandemic demands Students to learn how to use online platforms, adapt new learning methods, maintain student engagement and find new ways to evaluate and Python is a open source programming software. Python is a general purpose and high level programming language. You can use Python for developing desktop GUI applications, websites and web applications.

For high level programming python software is used. It provides core common programming tasks.

ELIGIBILITY

1. Students from any University, of Degree /Diploma levels, are eligible to participate.
2. All the Participants are required to fill up online registration form before the deadlines.
3. The Spoken Tutorial Project team conducts online exam and gives certificate to those who pass (by earning min.40% marks) the online test.
4. Participants should upload the proof of payment while registering through Google Forms.

Python supports cross-platform systems which makes building applications with the more convenient. Some of the globally known applications such as YouTube, BitTorrent, DropBox, etc. use Python to achieve their functionality. Python can be used to make web-applications at a rapid rate. Why is that? It is because of the frameworks Python uses to create these applications. There is *common-backend logic* that goes into making these frameworks and a number of libraries that can help integrate protocols such as HTTPS, FTP, SSL etc. and even help in the processing of JSON, XML, E-Mail and so much more.

Python is also used in the development of interactive games. There are libraries such as PySoy which is a 3D game engine supporting Python 3, PyGame which provides functionality and a library for game development. Games such as Civilization-IV, Disney's Toontown Online, Vega Strike etc. have been built using Python..

ABOUT THE TUTORIAL

COVID-19 Pandemic demands Teachers to learn how to use online platforms, adapt new teaching methods, maintain student engagement and find new ways to evaluate and Moodle is a learning platform designed to provide educators, administrators and learners with a single robust, secure and integrated system to create personalised learning environments.

Moodle is used for blended learning, distance education, flipped classroom, MOOCs and other e-learning projects in schools, universities, workplaces and other sectors.

ELIGIBILITY

1. All UG and PG students from all branches are eligible for this workshop. Engineering, art, science, commerce and management institutions at Degree /Diploma levels, of are eligible to participate.
2. All the Participants are required to fill up online registration form before the deadlines.
3. The Spoken Tutorial Project team conducts online exam and gives certificate to those who pass (by earning min.40% marks) the online test.

REGISTRATION DETAILS

For Registration contact the head of your respective department.

Registration Deadline: 2 Nov 2020.

(Students should register before 2 Nov 2020, after registrations verify mail received from spoken tutorial).

Examination Dates will be announced later. Certificates will be issued to all the participants after successful completion of test.

ABOUT COURSE

Most of the Scientific Task, Mathematical And Statistical Analysis are difficult to perform a free software that is capable of handling difficult tasks with efficient results. It is widely in data science for the complex analysis. It has own programming language and inbuilt functions perform any specialized task and provide data analysis in graphical form.

TOPICS COVERED

Day 1

Overview and installation of R and R Studio on window and linux. Introduction to Data Frames at working directories in R, R studio.

Day 2

Indexing and Slicing, Data Frames, Creating Matrices using Data Frames, Operations on Matrix and Data Frames

Day 3

Merging and Importing Data and data types

Day 4

Plotting Histograms and Charts, Introduction to ggplot2

Day 5

Data Manipulation and functions in dplyr Package.

Day 6

Operators and Conditional statements in R

Day 7

Functions in R

DATE: 15/09/2020
