General Education Credit

Theory 1 Credit = 15 hours	Practical 1 Credit = 30 hours	Experiential learning including relevant experience and proficiency/ professional levels acquired 1 Credit = 40-45 hours
<ul style="list-style-type: none"> In each theory class, a new concept is taught, and the student is learning something new throughout the class. It also involves self-learning. 	<ul style="list-style-type: none"> The practical is dependent on theory and experiments performed are based on concepts learned in theory class. Repetition of an already learned concept. Observations are taken again and again. 	Experiential learning including relevant experience and professional levels acquired activities like field visits, industrial visits, etc carry lesser weightage because it is just an observation and/or application of concepts learned in theory.
