| Date:                             | 17/04/2026 to 22/04/2026                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Participants:54<br>From, T.Y B.Tech<br>CSE(Data Science) | Advanced Features. |
| Name of Co-ordinator (S)          | Mr.Niranjan Patil<br>Mrs.Vinita Patil                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                          |                    |
| Objective for conducting activity | <ul style="list-style-type: none"><li>• To provide in-depth knowledge of PHP and MySQL for developing dynamic web applications.</li><li>• To familiarize students with server-side scripting and database management concepts.</li><li>• To introduce advanced features such as form handling, session management, and database connectivity.</li><li>• To enhance students' practical skills in full-stack web development.</li><li>• To prepare students for industry-level projects and placements.</li></ul>                                                                                                                                                                              |                                                          |                    |
| Methodology                       | <ul style="list-style-type: none"><li>• The workshop was conducted through a blend of theoretical sessions and practical hands-on training.</li><li>• Step-by-step demonstrations were given on PHP scripting, MySQL database creation, and integration.</li><li>• Students performed live coding exercises, including form validation, CRUD operations, and session handling.</li><li>• Real-time mini projects were assigned to apply learned concepts in practical scenarios.</li><li>• Interactive doubt-solving sessions and peer discussions were encouraged throughout the workshop.</li><li>• Continuous assessment was done through assignments and task-based activities.</li></ul> |                                                          |                    |
| Out Come                          | <ul style="list-style-type: none"><li>• Students developed a strong understanding of PHP and MySQL concepts.</li><li>• Gained hands-on experience in building dynamic and database-driven web applications.</li><li>• Improved skills in handling forms, sessions, and database operations (CRUD).</li><li>• Enhanced logical thinking and problem-solving abilities in web development.</li><li>• Increased confidence in developing real-time projects and readiness for internships and placements.</li></ul>                                                                                                                                                                              |                                                          |                    |
