Name of The Activity : One week Student Development Program on "Python 3.4.3"

Category of activity	Curricular		
Date:	10.11.2025 to 14.11.2025	**Participants profile:**	LY Electrical Engg. Students
Name of Co-ordinator (S)	Mrs R. S. Gulhane		
Guest/ Experts (If any)	By Spoken Tutorial IIT Bombay		
Objective for conducting activity	- To introduce students to the fundamentals of Python programming using an easy-to-follow Spoken Tutorial format. - To develop logical thinking and problem-solving skills through hands-on coding exercises. - To familiarize students with Python syntax, data types, control statements, and basic programming concepts. - To enhance students' ability to write simple programs for automation, computation, and data handling. - To promote self-paced learning using the standardized modules of the Spoken Tutorial project. - To encourage the use of open-source programming tools for academic and project-based work. - To build a strong foundation for advanced topics like data science, AI, and machine learning in the future.		
Methodology	Through online video lectures and assessment		
Out Comes	- Students gain foundational knowledge of Python programming and its basic constructs. - Improved logical reasoning and problem-solving skills through hands-on coding practice. - Ability to write and execute simple Python programs for calculations, data handling, and automation tasks. - Enhanced understanding of variables, data types, loops, functions, and file handling methods. - Increased confidence in using open-source software tools for academic and project-related work. - Students become familiar with industry-relevant programming practices at an early stage. - Strengthened readiness for advanced learning in areas such as data science, machine learning, and AI.
