| <b>Objectives for conducting activity</b>                                                                     | Program might aim to achieve<br><br>1. To introduce the concept of industry standards and codes and explain their importance in ensuring quality, safety, and consistency across different sectors.<br>2. To familiarize participants with major standards organizations (such as ISO, BIS, IEEE, etc.) and their roles in developing industry guidelines.<br>3. To provide an overview of standards and codes used in various industries like construction, manufacturing, IT, and energy.<br>4. To highlight the practical application of these standards in real-world projects and operations.<br>5. To explain the impact of compliance and non-compliance, including legal, safety, and financial implications |                             |                               |
| <b>Methodology</b>                                                                                            | Interactive session with students, Participation & Discussion, Presentation using slides (PPT), Use of real-world examples                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                             |                               |
| <b>Out Comes</b>                                                                                              | Outcomes that can be achieved through a program<br><br>1. Identify key industry standards and codes relevant to different sectors.<br>2. Explain the role and importance of standards organizations in maintaining quality and safety.<br>3. Understand how standards are applied in real-world scenarios across various industries.<br>4. Analyze the consequences of compliance and non-compliance with industry codes.<br>5. Select appropriate standards for basic projects or case situations in their field of study.                                                                                                                                                                                          |                             |                               |
