Subject: Free Paper Presentation/Seminar on '**Current Scenario in Software Technology and Android**'.

Respected Sir,

Expert in the knowledge of how the software market works and an experienced Android applications developer from our team would like to present a paper to the students of today's technology who are in need of exposure to the industrial requirements, so that these students can prepare for the current industry while they have time, and be ready to get sucked in the vast vacuum of job vacancy.

This vacancy only calls for proper knowledge and skills, for others it is of no use.

The technology industry has noticed a gap between the college education and industry standards, and we can see efforts from many companies to fill this gap by incorporating training centers in their companies' itself.

Hence, with your permission we would like to present a paper in your institute to your well educated students. Please grant us permission and give this youth the proper direction for what your institute had intended.

Seminar Topic: **Current Scenario in Software Technology and Android.**
Duration: 1 hour.
Speaker: Mohsin Shaikh.
Bachelor of Engineering. E&TC.
Experience: 5 years' experience as an Android applications developer.
Companies:

1. BoxMyTV, Pune.
2. Xerces Technologies, Pune.
3. Multicore solutions, Jalgaon.
4. Almond Technologies, Jalgaon.
